

# Real Agile Transformation

## Using CI/CD

Build your team's agility with faster feedback

A.Mert Şirvancı - 19/10/2021

# Continuous Integration (CI)

What is mean?

“The DevOps practice of automating the merge code changes ( Integration ) from developers into a single project”

- Eliminate bureaucratic cost
- Faster Code Releases
- Higher rates of failure

**Product Quality**

# Continuous Delivery/Development (CD)

Just one difference

“The delivery phase is responsible for packaging an artifact together be delivered to end-users

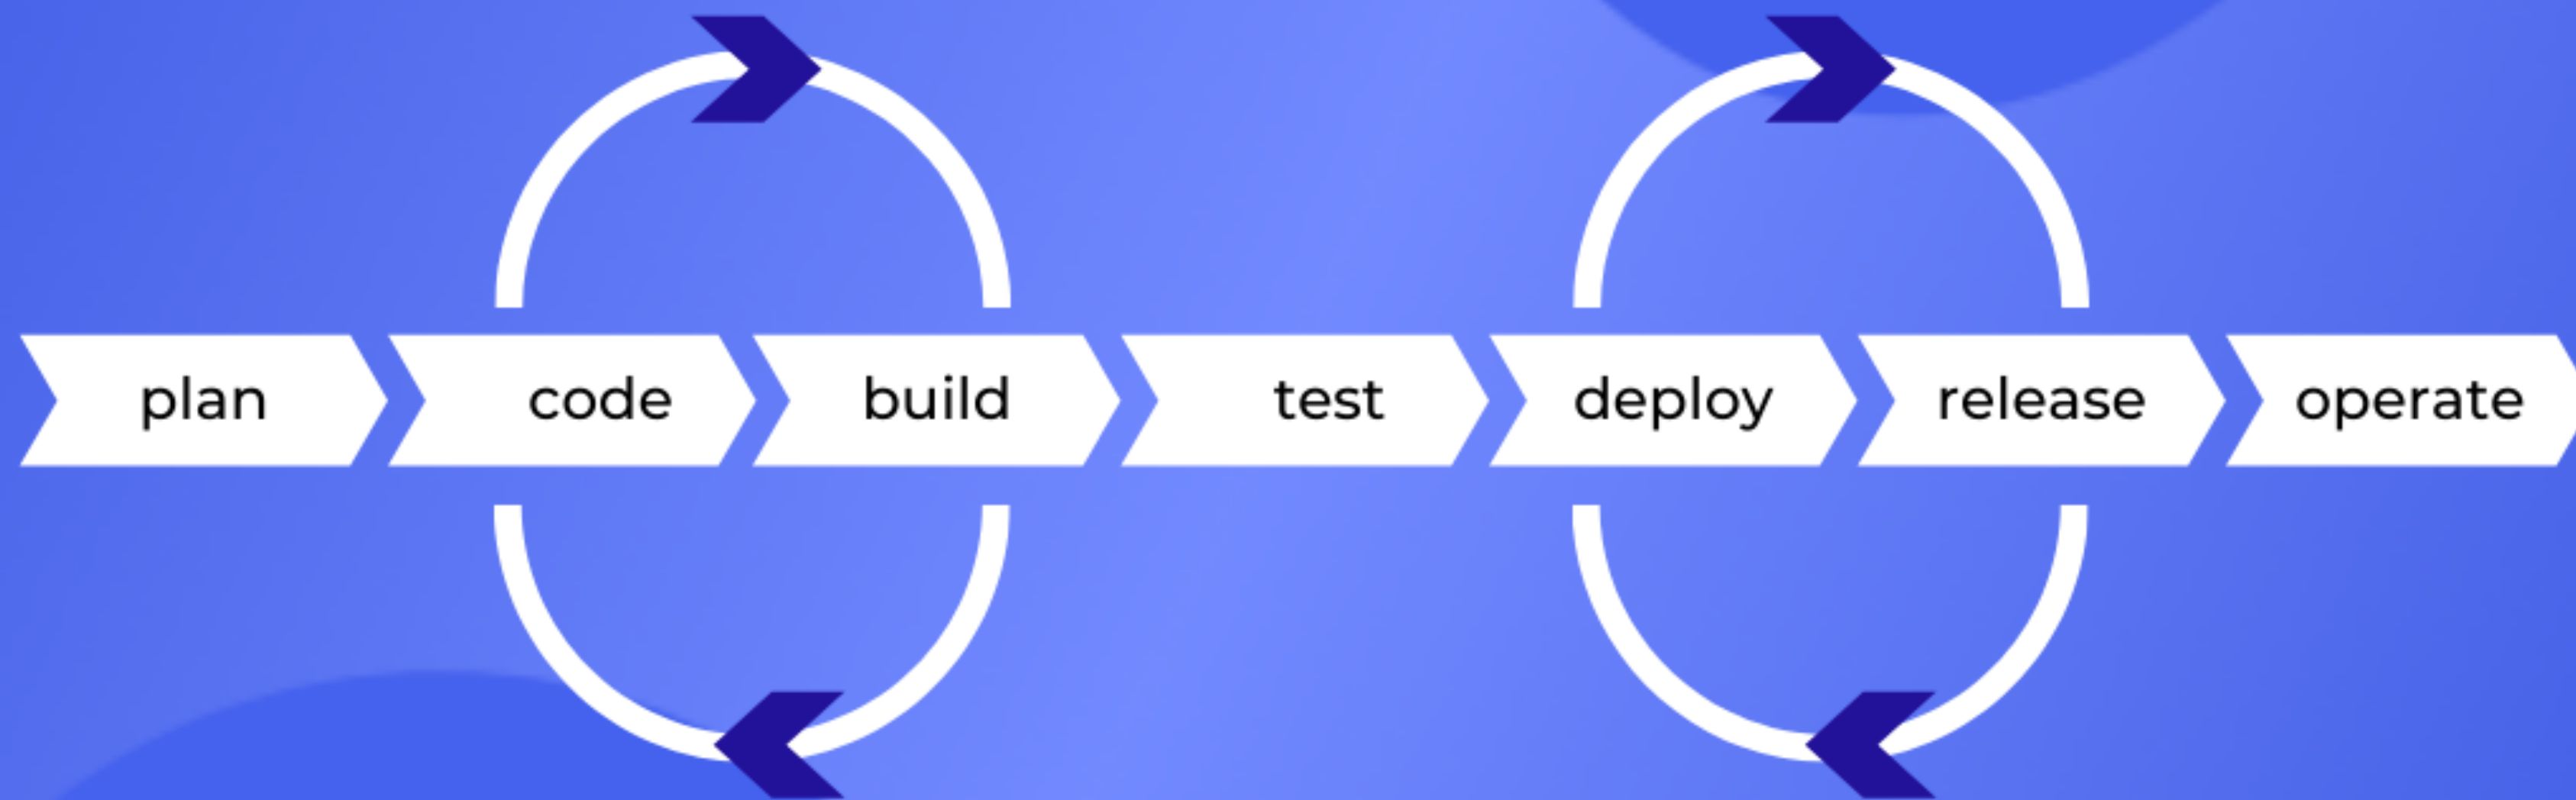

Our fantastic business feature —————>(Pipeline) Valuable Customers
